PROFILE

Product Delivery Lead / Senior Product Manager with 8+ years of experience delivering digital products and building scalable delivery processes across fintech, e-commerce, HRTech, and real estate. Strong background in product management, business/system analysis, and cross-functional execution. Led end-to-end delivery of customer-facing and internal platforms, including integrations, automation, process redesign, and operational improvements. Experienced in aligning product, engineering, analytics, QA, design, and business teams, managing roadmaps, backlogs, and dependencies, and translating complex requirements into measurable business impact. Experienced in building scalable delivery systems and improving product operating models across cross-functional teams. Experienced in translating business strategy into scalable product initiatives and delivery execution. Well positioned for leadership roles at the intersection of product strategy, execution, and product operations.

EXPERIENCE

Delivery Lead for Digital Transformation / Principal Analyst

Renmoney. Lagos, Nigeria | Feb 2025 – present

Drove execution of digital transformation initiatives across business, engineering, and integration stakeholders.

Improved delivery performance by increasing task delivery speed by **34%** and reducing active backlog by **63%** through process standardization and structured request management.

Owned backlog management and prioritization across analytical and integration streams, ensuring focus on high-impact initiatives.

Established and improved engineering delivery processes across backend, analytics, and QA teams.

Transitioned the backend team to a Kanban workflow, improving task flow visibility and delivery predictability.

Redesigned and optimized Jira setup, including workflows, task structures, and backlog organization to support scalable delivery.

Introduced an RFC (Request for Comments) process to improve technical alignment and reduce implementation risks.

Defined and implemented a structured collaboration model across analysts, developers, and QA, improving cross-functional efficiency.

Standardized delivery processes and ways of working across teams, improving consistency and reducing fragmentation.

Design, Roadmap Planning,
Backlog Management, Jira
Workflow Design, Delivery
Process Design, Release /
Delivery Tracking

Analytics: SQL, Funnel Analysis,
Product Analytics, A/B Testing,
KPI / OKR

Integrations & Systems: REST
APIs, JSON, System Integrations,
Data Layer

Operations & Process: Product
Operations, Workflow
Automation, Process
Optimization, RFC Process

Collaboration: Figma

ADDITIONAL

Leadership & Mentoring:

Mentored students at Tinkoff
Fintech School; 8 out of 9
participants received job
offers after graduation.

Lecturer at Bauman Moscow
State Technical University for
5 years, teaching
programming and SQL.
Supervised graduation
projects; one student
received a state grant for
their thesis

Prioritized initiatives based on business impact, delivery constraints, and technical complexity.

Enabled engineering teams to improve delivery performance through better workflows and prioritization.

Unified API requirements and developed integration specifications for internal and external systems.

Acted as a bridge between business stakeholders and technical teams, reducing ambiguity and accelerating delivery cycles.

Senior Product Manager

Megapolis Real Estate, Dubai, UAE | Jul 2024 - Feb 2025

Led end-to-end relaunch of the corporate website, coordinating business, design, development, and analytics stakeholders.

Reprioritized backlog and delivery scope to accelerate release of high-impact improvements.

Analyzed user behavior, identified funnel bottlenecks, and ran hypothesis-driven improvements and A/B tests.

Increased website traffic by 18% and improved website conversion funnel

Aligned product delivery with business goals focused on lead generation and acquisition efficiency.

Delivery Lead for Digital Transformation / Senior Product Manager

Leroy Merlin, Moscow, Russia | Mar 2021 - Nov 2024

Leroy Merlin is the largest e-commerce platform in Russia

E-commerce + HR

Owned and led delivery of HRTech products and internal platforms supporting recruitment and employee operations across a nationwide retail network (111 stores + headquarters).

Balanced business goals, operational efficiency, and user needs when prioritizing product initiatives.

Designed and scaled systems and processes used by ~1,100–1,400 employees, improving operational efficiency across distributed store locations.

Owned product delivery for recruitment-related systems, defining workflows, requirements, and integrations for internal users (HR, operations, store managers).

Launched the "Call a Friend" referral system, increasing free candidate inflow by 30%.

Replaced call-center-driven workflows with a chatbot-based system, reducing operational costs by 92%.

Improved candidate journey and internal hiring workflows, increasing Candidate NPS by 2 points.

Defined and delivered integrations between internal systems and external services to support scalable recruitment operations.

Built and maintained a large-scale Data Layer to track funnel performance, operational metrics, and system efficiency.

Standardized and scaled recruitment-related processes and product solutions across 111 stores and headquarters.

Improved process consistency across distributed teams and reduced operational fragmentation.

Enabled internal teams (HR, operations, store managers) to work more efficiently through improved systems and workflows.

Product Manager

Dom RF bank, Moscow, Russia | Nov 2020 - Feb 2021

Dom RF Bank is a state-owned bank.

Designed and delivered the “one-click mortgage approval” process, simplifying customer journey in a regulated banking environment.

Defined product and integration requirements for external services, including Rosreestr and credit bureaus.

Coordinated cross-functional delivery across business and technical stakeholders to support launch readiness and compliance needs.

Product Manager

Product areas: Managed multiple product domains across mortgage, real estate, partner platform, and B2B growth initiatives within Tinkoff's fintech ecosystem. Translated business objectives into product initiatives across multiple domains, aligning product delivery with growth and operational goals.

Tinkoff Bank, Moscow, Russia | Jan 2017 - Nov 2020

Tinkoff Bank is one of the largest fintech companies in the world.

Drove product initiatives aligned with growth, partner expansion, and operational efficiency goals.

Rewards Product (Sep 2019 - Nov 2020):

Led product delivery for the Rewards partner platform, improving partner onboarding and operational efficiency.

Developed a self-service partner area, reducing manager effort required to launch new offers by 80%.

Increased the number of new partners by 300 through scalable onboarding and process simplification.

Replaced paper-based workflows with electronic document flow, accelerating document processing by 2x.

Built a client request handling process with 73% of requests automated via bot support.

Improved customer-facing app experience, increasing NPS by 0.7 points.

Delivered a new manager workspace to scale partner operations capacity.

Owned analytics and integrations with partner systems and CRM platforms.

B2B Cross-sell Product (Jul 2019 - Sep 2019):

Designed and launched B2B customer activation flows to support cross-sell growth.

Mortgage and Real Estate Product (Jun 2018 -Jul 2019):

Led end-to-end delivery of mortgage and real estate digital products, from MVP launch to scale-up.

Launched an MVP for real estate sales in 1.5 months; within a year the product became a strong competitor in the new-builds market.

Drove acquisition through free channels, generating 60,000 applications in the first month.

Delivered a personal account and mobile app for real estate agents, improving end-to-end conversion by 1.79%.

Led analytics and integrations with bank partners, developers, and external ecosystem participants.

Contributed to the design of a market-leading user experience that supported Tinkoff's recognition by Global Finance as Best Digital Mortgage Bank in 2018.

Mortgage Product (Jan 2017- Jun 2018):

Led integrations with partner banks and real estate developers to support mortgage product expansion.

Improved customer account experience through UX and interface enhancements.
